"CEOs Roundtable on Sustainability Solutions for Manufacturing Sector"

Date: Thurs, 22 July 2010 Time: 10am - 1pm Venue: SBF Board Room (22nd level, Keppel Towers)

Fee per pax (incl of 7% GST): Complimentary and by Invitation Only

Synopsis

Sustainable Manufacturing has been defined as the creation of manufactured products that use processes which are nonpolluting, conserve energy and natural resources, and are economically sound and safe for employees, communities and consumers.

According to a recent study by Singapore Institute of Manufacturing Technology (SIMTech), Singapore's sustainable manufacturing effort has been largely focused on energy efficiency, carbon footprint and recycling & manufacturing. The various assistance schemes like the Energy Efficiency Assistance Schemes and Certified Energy Manager Training Grant have been assisting Singapore companies who are sustainable manufacturers. The response from the industry has been highly positive. Companies like: 3M, GlaxoSmithKline, Pfizer Asia Pacific and Shell Eastern Petroleum are among the 49 companies that become the founder partners of the Energy

Registration

Efficiency National Partnership (EENP), which help implement energy productivity projects within the companies.

Jointly organized by Singapore Business Federation (SBF), Singapore Manufacturers Federation (SMa), Sustainable Energy Association of Singapore (SEAS), SPRING Singapore and Temasek Polytechnic (TP), the aim of the CEOs Roundtable on Sustainability Solutions for Manufacturing Sector is to encourage small numbers of CEOs and corporate leaders to explore, in great detail, strategic challenges faced by organizations in sustainable manufacturing in Asia and globally as well as emerging trends, risks and opportunities. The series will bring together top executives for candid conversations about their work and their industries, with ample opportunities to network. Topics to be covered include energy efficiency, clean technologies and renewables, carbon management, climate regulation, and supply management.
