

LEGAL ASPECTS OF SUSTAINABLE ENERGY

COURSE OVERVIEW

The course will cover the common contracts that energy companies enter into such as energy performance contracts and power purchase agreements. Course participants will also be able to find out how energy companies raise finance for their sustainable energy projects and develop renewable and clean energy projects in Southeast Asia. This course will also cover the ways in which energy companies can mitigate their legal risks in harnessing innovations for clean energy and how energy companies can manage their intellectual property rights in clean energy collaborations.

COURSE OBJECTIVES

To be able to identify and understand the terms that are commonly found in energy performance contracts and power purchase agreements.

To gain an understanding of how energy companies raise funds for their projects, develop renewable and clean energy projects, mitigate their legal risks in utilising their innovations and manage their intellectual property rights in respect of their collaborations.
