Supported by:

**CLEAN ENERGY SEMINAR 2008
May 16th 2008
Grand Hyatt Hotel
8.30 am to 11.30 am
BREAKFAST TALK**

Background

The Clean Energy industry comprises a broad range of areas, including:

- Renewable energies (biomass, wind, solar, biofuel, etc.)
- Energy efficiency (managing energy consumption)
- Carbon services (carbon emission reduction)
- Finance and investment

Clean energy is currently a key growth industry in Singapore. By 2012, the industry is expected to create 12,000 jobs and generate S\$ 1.7 billion revenue. With a total public funding of S\$ 350 million, the Singapore government has launched a series of programs to develop the clean energy industry while supporting investments from the private sector through incentive measures.

Objectives

In this dynamic industry context, the FCCS would like to offer this seminar on clean energy for French and European organizations to present their expertise in clean energy and to gain insights into the mechanisms of the Singapore clean energy market to detect business and investment opportunities.

Placed under a European umbrella, this seminar will also provide a platform for initiating business matching and exchange between European and Singaporean organizations and regulatory bodies. Participants will also have the chance to gain insights into regional markets.

Preliminary Agenda

- Welcome
- **Somfy** (Serge Neuman): Clean building in ASEAN: regional market opportunities and initiatives
- **EDB**: Insights into government initiatives and incentive measures in the clean energy industry
- **Rhodia** (Manufacturing, Chemicals), **Elyo** (Energy Efficiency, Facility Management), **Veolia** (Water solutions)
- RE Co. / Oerlikon – Renewable energy: Why investing in Singapore?
- Q&A Session
- Conclusion
