

Date : 14 – 16 May 2012
Location : Bali, INDONESIA
Highlights : Clean Power Asia 2012, the region's premier platform to discuss the latest renewable and cleaner fossil power developments, brings together the entire value-chain involved in Asia's clean power projects

The Sustainable Energy Association of Singapore (SEAS), with support from SPRING Singapore, IE Singapore, and Singapore Business Federation, is organising a Trade Mission to Bali, Indonesia to exhibit at Clean Power Asia 2012.

INDONESIA RENEWABLE ENERGY VISION

Indonesia has a clear target to optimise its energy mix and to improve the renewable energy portion to 25% by 2025. In order to achieve its renewable energy targets and improve the mix of new renewable energy, the Ministry of Energy and Mineral Resources is also exploring other renewable energy sources, in addition to geothermal, including hydroelectric, solar and bioenergy as a way to increase energy security in Indonesia. Indonesia's Clean Energy Initiative, an integrated effort to reduce greenhouse gas emissions from fossil fuels burning, is intended to not only meet national emission reduction targets, but also to sustain Indonesia's national energy security. Clean Power Asia will present you with the latest clean power policy updates from Indonesia.

ABOUT CLEAN POWER ASIA CONFERENCE & EXHIBITION

CLEAN POWER ASIA will focus on clean energy initiatives, innovative approaches in renewable energy projects and new cleaner fossil power initiatives throughout the region with a specific focus on Indonesian market developments. The conference and exhibition is expected to attract over 600 power utility industry professionals from the region and beyond, interested in the latest developments and innovative clean power approaches. The exhibition provides an excellent opportunity for power generation executives to shortlist new products and technologies, identify new suppliers or to understand the latest industrial developments.

Highlights (of Trade Show)

- Over 80 senior-level officials and executives from across the Asia Pacific region speaking over 3-days
- Network with 600+ power industry professionals looking to join these discussions
- Highly anticipated Exhibition Floor to showcase new and emerging technologies in the RE and Clean Energy sectors
- Learn about upcoming clean and renewable energy projects, initiatives, programmes and developments
