

SEAS and KEZAD Sign MOU to Strengthen Sustainable Energy Collaboration and Boost Trade Between Singapore and UAE

Singapore, April 9, 2025 – The Sustainable Energy Association of Singapore (SEAS) and Khalifa Economic Zones Abu Dhabi (KEZAD Group) have signed a Memorandum of Understanding (MOU) to deepen bilateral cooperation in sustainable energy and foster stronger trade and investment ties between Singapore and the United Arab Emirates (UAE).

Through this MOU, SEAS and KEZAD have agreed to work collaboratively to grow trade and investment flows between both countries. The partnership aims to create new opportunities for businesses, particularly in the areas of clean energy and green innovation, reinforcing both nations' commitment to sustainability and economic diversification.

A key focus of the collaboration is the exchange of knowledge and information in the sustainable energy sector. By sharing industry insights, developments, and best practices, SEAS and KEZAD seek to facilitate greater understanding and cooperation between stakeholders in Singapore and the UAE.

To further promote this partnership, both parties will co-organize joint events such as webinars, business forums, and networking activities. These initiatives will spotlight SEAS and KEZAD's respective services and provide valuable platforms for their members to engage and explore opportunities for collaboration.

In addition, SEAS will play a key role in connecting KEZAD and AD Ports with its extensive business network. This includes facilitating introductions, arranging business meetings, and supporting visits from UAE delegations to Singapore and the wider Southeast Asia region.

Conversely, KEZAD will support SEAS in organizing business delegations to the UAE. This includes helping to coordinate visits, set up business matchmaking sessions, and assist Singapore-based companies in exploring commercial opportunities within KEZAD and across the broader UAE market.

This MOU represents a significant step toward strengthening the economic and sustainable energy ties between Singapore and the UAE. Both organizations look forward to fostering meaningful partnerships that drive innovation, green growth, and shared prosperity.

About SEAS

The Sustainable Energy Association of Singapore (SEAS) represents the interests and provides a common platform for companies in Renewable Energy, Energy Efficiency, and Financial Institutions to meet, discuss, collaborate and undertake viable projects together. The Association is a non-profit, non-government business association, and its mission is to assist its members in

achieving sustainable growth locally and regionally through business development, market development, as well as training and learning platforms. SEAS plays a strategic role in aiding the realisation of Singapore's vision; to be a global centre for sustainable energy, where products and solutions are developed and exported.

For more information about what the Association does and its services, please visit www.seas.org.sg

About KEZAD

KEZAD Group is the UAE's largest provider and operator of fully integrated economic cities, free zones, value-added business services, and staff accommodation, and industrial real estate solutions. KEZAD Group's 12 economic zones (Located in Abu Dhabi, Al Ain and Al Dhafra Region) provide an ecosystem combining world-class transportation infrastructure with multimodal connectivity by road, ports, air, and national rail networks, 100% foreign ownership, 100% repatriation of capital and profit, the potential for duty-free trade within the region, and advanced technology platforms that integrate port community systems with the economic zones.
